EDUCATION

Herald College Kathmandu (University of Wolverhampton)
Bachelor of Science (Hons) in Computer Science

Completed: 2026

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building AI-powered applications, machine learning models, and software projects using Python, JavaScript, React, Node.js, and C#. Familiar with AWS, Docker, Git, and DevOps practices, with a strong interest in AI product development, cloud engineering, and full-stack software development.

SELECTED TECHNICAL PROJECTS

Gamified Learning Web Application — Final Year Project

MERN | Ollama | Blender

- Integrated Ollama's Phi-3 mini model in the web application to provide AI generated responses.
- Built application functionality across the frontend and backend using the MERN stack.
- Implemented RESTful APIs to handle communication between the frontend, backend, and locally hosted Ollama AI model.
- Created animations using Blender to add to the gamification component of the project.

NLP hate speech detection (Group Project)

Python | TensorFlow | Keras | LSTM | Word2Vec

- Developed text classification models to detect hate speech in tweets.
- Applied text preprocessing, tokenization, and sequence padding before model training.
- Compared SimpleRNN, LSTM, and Word2Vec-based LSTM approaches.
- Evaluated model performance and generated predictions on unseen test data.

Traffic Sign Classification using CNN (Group Project)

Python | TensorFlow | Keras

- Developed and evaluated deep learning models for traffic sign classification using TensorFlow and Keras.
- Compared multiple CNN architectures, optimizers, and transfer learning using VGG16.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-score.

SKILLS

- **Programming:** Python, C#, JavaScript, SQL
- **AI & Machine Learning:** TensorFlow, Keras, NumPy, Pandas, CNNs, NLP, LSTM, Word2Vec, LLM integration
- **Tools:** Git, GitHub, Unity, Jupyter Notebook, VS Code, Docker, AWS, Ollama
- **Web Development:** MERN stack, REST APIs
